

SlimStone

Over the last few decades, Mount Machinery has become known for its expertise in rock breakers. We are deeply passionate for innovation which is constantly shaping the future of rock breaking.

After all these years of learning, experience and problem solving, we are pleased to introduce the 4TÉ SlimStone Series: the narrow but punchy rock breaker for the utility trade.

Being only 135mm wide, the FRB-352-U is a tool for extensive utility excavations. Trenches are narrower meaning there is less to excavate and less aggregate and tarmac to re-instate, saving on material cost.

SlimStone

Lightweight

Weighing only 86kg the 4TÉ SlimStone FRB-352-U is easy to pick up and throw in the back of a van by 2 people.

Stronger

The unit has a 50mm diameter tool therefore much stronger.

Streamlined Design

The pipes come out of the front of the rock breaker so as not to get caught on the trench sides or if rolled over on its side.

Performance Features

- Reduced width – very narrow
- Easy to Handle
- Increased Strength
- Powerful

	Excavator weight range (T)	Operating weight (Kg)	Operating pressure (bar)	Required flow (L/min)	Tool diameter (mm)
FRB 352 U	0.8-2.5	86	80-100	20-35	50
