

MOUNT MACHINERY

Ripper Teeth

Our powerful, heavy duty 4TÉ ripper teeth are available for most excavators. Made in Germany, these ripper teeth are truly a cost effective way of extracting stubborn material and objects in the demolition, quarrying and landscaping industries prior to excavation with buckets.

4TÉ Capstone Ripper teeth are the ideal product for making easy work of harder ground. The dedicated tip makes removing or loosening rocks simple where other attachments would struggle.

What does 'Made in Germany' mean to you?

...to us it means;

- superb quality,
- built to perform,
- built to last,
- and the pinnacle of innovation resulting in this great product we have to offer you.
