EXCAVATOR ATTACHMENTS FOR HIRE OR SALE

Better productivity for the same fuel consumption and in less time!

What we do...

- Excavator attachment hire, including delivery, fitting and auxiliary check to your excavator.
- Excavator attachments also available for purchase - we have stocks of new and used attachments.
- Repairs and servicing of your attachments are carried out in our fully equipped workshop in Leeds where we also carry stock of attachment parts for supply if you require.

OUR MISSION

The most trusted excavator attachments provider for the UK & Ireland with a passion for being active, responsive and innovative.

OUR SERVICES

Sales, hire, servicing, repairs and the supply of parts for excavator attachments using our expertise & accumulated knowledge.

OUR TEAM

A family run business with a deep-seated ethic of honesty, integrity, quality and service.

OUR ATTACHMENTS LAST LONGER!

All elements harmonised for maximum use.

We provide an all-encompassing performance optimisation strategy for the excavator and attachment combination including mechanical, electrical, hydraulic and human elements involved.

By this we mean every last performance factor is harmonised to provide the most efficient optimised operation.

Our Exclusive Range Of
EXCAVATOR TOOLS

4TÉ is Mount Machinery's own brand of excavator tools. 4TÉ is derived from the word Forté and is pronounced "FOR-tay".

The root of the word means "strong point", as in a military fort and in our language not only does it mean muscle strength but also bomb proof strength-like character in build.

Rock Breakers

Hydraulic breakers available to suit any excavator with a weight from 700Kg to 87 tonnes.

Excavator Weight Range: 700Kg - 87T

Utility Breakers

A narrow but punchy rock breaker for the utility industry where narrowness is of most importance. A much preferred breaker by many operators.

Excavator Weight Range: 500Kg - 9T

Augers

Augers for hire to suit excavators from 4T to 21T. 150mm, 225mm, 300mm, 450mm, 600mm and 800mm diameter auger flights available.

Excavator Weight Range: 4T - 17T

Ripper Teeth

Our heavy duty ripper teeth are available for most excavators. Ripper teeth are truly a cost-effective way of extracting stubborn material and objects from the ground.

Excavator Weight Range: 3T - 53T

Pulverisers

German made & full of innovative features, these attachments are predominantly designed for more technical demolition and processing.

Excavator Weight Range: 15T - 85T

Compactor Plates

A super effective compaction tool to speed up the backfill process in deep drainage, deep excavations, pipelines, embankments and more.

Excavator Weight Range: 4T - 30T

Land Rakes

Heavy Duty Land Rakes for loosening up hard ground, extracting larger than brick-size stones or removing roots from younger vegetation and small trees from the ground.

Excavator Weight Range: 16T - 24T

Rake Riddles

A combined rake and riddle in one attachment for mini excavators.

Excavator Weight Range: 700Kg - 3T

Riddle Buckets

Save muck away costs and recycle on-site by separating the fines from the boulders.

Excavator Weight Range: 3T - 45T

Screening Buckets

Hydraulically adjustable screening bucket; the material output size can be adjusted within seconds! No need for drum mesh plates to be replaced as this is two drums (one inside the other) and is controlled from the cab.

Excavator Weight Range: 4T - 25T

Concrete Buckets

Designed to pour concrete, but can also be used for pouring a range of aggregates with accuracy. Fitted with a chute and gate, to maximise your flow and pouring control.

Excavator Weight Range: 5T - 25T

Tilting Buckets

Doing some ground profiling or landscaping and don't have a tiltrotator? - Here's a great alternative!

Excavator Weight Range: 10T - 16T

Buckets

Various sizes of new and used heavy duty buckets for digging and grading.

Excavator Weight Range: 18T - 36T

Kerb Lifter

Designed to handle a wide range of kerbs with ease and accuracy.

Excavator Weight Range: 1T - 25T

Selector Grabs

Selector grab hire for demolition, waste recycling, general tidying up and sorting out your site.

Excavator Weight Range: 5T - 50T

Rock Grabs

Easily manipulate objects which are awkward to handle with this rock grab! It's three point contact ensures secure and controlled handling whatever shape your object is.

Excavator Weight Range: 18T - 34T

Pallet Forks

A handy utility for an excavator, one machine for all, no need for a forklift.

Excavator Weight Range: 6T - 25T
